

Salient

Analyze, Explore, Automate

Extract, manage and organize relevant information, no matter where it is.

Salient integrates into your workflow and provides a centralized, intelligent way to interrogate and analyze large quantities of text and other unstructured data.

- Web-based
- Collaborative
- Integrated AI
- Fast & Easy Setup
- Code-free Automation
- Cloud or On-Premise

Why Salient

- Integrates documents from across your organization and external sources
- Learns from your workflow
- Automates finding, extracting, tagging and organizing information
- Built for business users

Sample Applications

- Label thousands of contracts with key terms
- Build a database of startups and funding rounds from press releases
- Extract trading signals from news or tweets based on your own specific criteria

Salient

Analyze, Explore, Automate

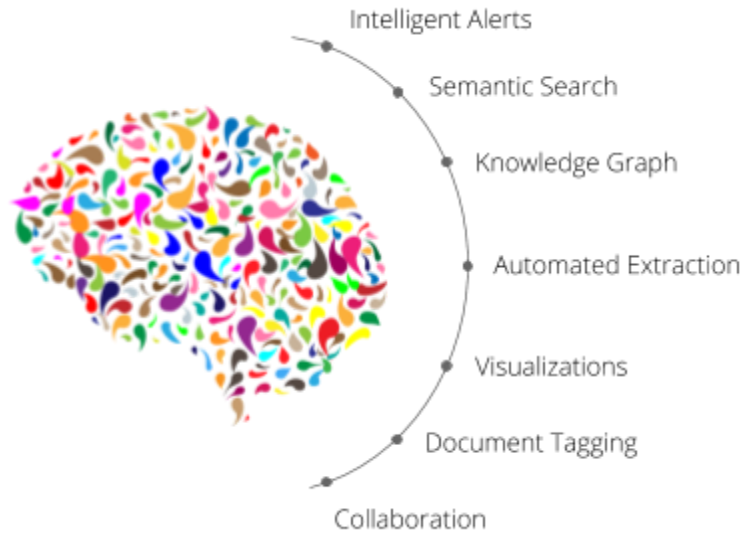

Smart Highlighters

Automate away the tedium of poring through hundreds of pages to find what you need.

Smart Highlighters learn by example and very quickly start finding and extracting any relevant phrases from across all your documents, saving you countless hours.

From Text to Tables with Patterns

Unlock the knowledge in your text and instantly generate tables summarizing information from hundreds or thousands of documents.
